

AI OPERATIONS & PROCESS OPTIMIZATION LEADER | AUTOMATION | DIGITAL WORKFLOWS | STARTUPS

Strategic operations leader with experience driving AI-assisted workflow automation, digital transformation, and scalable operational systems in startup environments. Proven success implementing process optimization initiatives, collaborating with AI and development teams, and improving operational efficiency through automation, SaaS platforms, and data-driven workflows. Skilled in cross-functional leadership, systems implementation, remote team management, and operational scaling. Experienced in identifying automation opportunities and translating operational challenges into scalable digital workflow solutions. Seeking remote opportunities focused on AI operations, automation, digital transformation, and operational strategy

BEST AGENT TODAY | REMOTE

2006-Present

Director of Operations & Digital Transformation

2021– Present

- Partnered with an AI automation specialist to develop and implement an automated Profile Builder platform that scrapes online data sources, generates structured agent profiles, and transfers validated data directly into internal databases, significantly reducing manual data entry and improving operational scalability.
- Established scalable operational systems for a startup providing digital profile and online presence solutions for real estate professionals, improving workflow efficiency and operational consistency.
- Led operational testing, workflow refinement, and implementation feedback during platform development, improving data accuracy, user experience, and process efficiency.
- Leveraged AI tools including ChatGPT, Gemini, Perplexity, and Zapier to streamline operational workflows, research processes, content generation, and automation initiatives.
- Act as Secretary of the Board, providing strategic insights and collaborating closely with the CEO and lead investor on key decisions.
- Coordinate with product development and marketing teams, ensuring alignment with the company's vision and market demands.
- Manage the advancement of subscriber management platform, overseeing the transition from V1 to V2, and ensuring seamless user experience by testing and providing feedback for software enhancements in staging.
- Supported digital growth initiatives through SEO optimization, automation-assisted content workflows, and targeted digital campaigns.

Operations Manager

2019 - 2021

- Managed branding campaigns and oversaw onboarding of new partners and staff, fostering a collaborative work environment.
- Key liaison between the company and external stakeholders, including product development contractors and marketing specialists.

H.D. SMITH | STRATHAM, NH

2006 – 2019

Warehouse Manager

2012-2019

- Managed a third-party pharmaceutical distribution center, focusing on supply chain optimization and operational restructuring.
- Retained a significant client base (3.6M in monthly sales) by developing innovative solutions to overcome system limitations.
- Streamlined warehouse operations by implementing new inventory management software, increasing process efficiency.
- Led the division-level implementation and training of SAP modules.
- Ensured strict adherence to DEA, FDA, PDMA, and OSHA regulations, maintaining a record of 100% compliance.
- Achieved a status of no outstanding risk with insurance provider by adhering to all risk improvement recommendations.

Inventory Control/Returns Supervisor

2011 - 2012

- Oversaw operational, financial, quality control, and inventory support functions within high-volume distribution operations.
- Reengineered the reverse logistic process for maximum efficiency and effectiveness.
- Implemented a cycle count procedure, ensuring accurate valuation of physical inventory and maintaining inventory integrity.

Inventory Control Supervisor

2006 - 2011

- Effectively managed a budget of \$43M and negotiated with vendors to optimize supply chain efficiency.
- Conducted biannual comprehensive physical inventories of over 24,000 SKUs, ensuring accurate stock levels and inventory control.
